Wall Control

Maveo, Simply Connected

The Maveo Blufi stick brings Wi-Fi connectivity to your residential garage door openers by working seamlessly with your Marantec door opener. The Blufi stick is a plug n' play wifi adapter that simply inserts directly into the garage door opener. Control doors from anywhere in the world via the Maveo app. Turn on/off lights, set the timer-to-close function to have the opener close automatically, set up 'coming home' feature by activating the Geo-Fencing function, and provide guest access to others.

Power & Speed Redefined

Strong, quiet and powerful, the Synergy series is built with long-lasting DC motors. Incorporates soft-start/soft-stop technology designed to reduce wear and tear on your garage door and operator system. Open and close your garagedoor in as little as 9 seconds.

Homelink® & Remote Controls

Synergy garage door openers are Homelink compatible and allow for remote door control from your vehicle. Our garage door openers use a secure multi-bit code technology that allows you to program an unlimited amount of Synergy remote controls.

Battery Backup System

We offer a battery backup system which is compatible with all Synergy operators and allows illuminated garage door operation during power outages. All Synergy openers sold in California (and available everywhere else) are equipped with an integrated battery backup system in compliance with requirements of California's SB969 and health and safety codes 19890 and 19892.

Limited Lifetime Warranty

The Synergy 370 & Synergy 380 offer a limited lifetime, hassle-free warranty on motors, gears and rail systems and up to an 8 year warranty on parts and 1 year warranty on accessories.
