

Another **Accessory** You Won't Have to Stock

Most garage door openers still do not deliver the quiet performance that your customers demand. Some folks say they make a garage door opener that's quiet, but what they really mean is that their opener is not as loud as it used to be.

At Marantec, when we say quiet, we mean it. We understand that performance doesn't have to be loud — the Marantec chain and belt drive garage door opening systems are what we say they are — quiet.
